TRENDS IN
ANALYTICAL
CHEMISTRY

Volume 9

REFERENCE EDITION
1990

CONTENTS

JANUARY, 1990

meeting reports

5th International conference on particle-induced X-ray emission and its analytical applications, *by R. D. Vis* 1
2nd International conference on chemical kinetics, *by R. I. Martinez and J. T. Herron* 2

computer corner

Programming direct memory access data acquisition, *by P. D. Wentzell, S. J. Vanslyke and A. P. Wade* 3

feature

Flow chemography — the future of chemical education? *by B. R. Kowalski, J. Ruzicka and G. D. Christian* 8

trends

Chemical degradation of condensation polymers as a preliminary to chromatographic examination, *by J. K. Haken* 14
The resurgence in time-of-flight mass spectrometry, *by D. Price* 21
Practical applications of solid state ^{13}C NMR to the structural elucidation of sedimentary organic matter, *by R. L. Patience and M. A. Wilson* 26
Use of silica with reversed-phase type eluents for the analysis of basic drugs and metabolites, *by B. Law* 31
Recent advances in multimodal thin-layer chromatography, *by H. J. Issaq* 36

FEBRUARY, 1990

meeting reports

Chromatography, international symposium 1989, *by K. Jinno* 41
International symposium on the analysis of nucleoside, nucleotide and oligonucleotide compounds, *by E. A. de Bruijn* 42

computer corner

Mouse manipulations in C, *by K. Janssens and P. Van Espen* 47

trends

Expert systems in chemical analysis, *by J. A. van Leeuwen, L. M. C. Buydens, B. G. M. Vandeginste and G. Kateman* 49
Process control — a challenge for expert system technology, *by M. De Winter, D. Grietens and M. Rijckaert* 54
An expert system for the validation of high-performance liquid chromatographic methods, *by L. M. C. Buydens, J. A. van Leeuwen, M. Mulholland, B. G. M. Vandeginste and G. Kateman* 58
Application of expert systems programming to high-performance liquid chromatography method development, *by S. S. Williams* 63
A knowledge-based system for structure analysis from infrared and mass spectral data, *by H. J. Luinge* 66
Fuzzy expert systems, *by M. Otto* 69

MARCH, 1990

monitor

The accuracy and completeness of references cited in selected analytical chemistry journals, *by T. Braun and A. Pálos* 73

meeting reports

8th International symposium on affinity chromatography and biological recognition, *by W. H. Scouten* 74

11th International symposium on microchemical techniques, *by J. A. C. Broekaert* 75

computer corner

Software to test the hypothesis of normal distribution of data according to Kolmogorov's test, *by J. C. Olucha and F. X. Rius* 77

feature

A practical guide to pH measurement in freshwaters, *by W. Davison* 80

observer

Industrial applications of vibrational spectroscopy, *by K. S. Kalasinsky* 83

trends

Biospecific assays with time-resolved fluorescence detection, *by E. Soini* 90

Circular dichroism — I. Theory and practice, *by N. Purdie and K. A. Swallows* 94

Characterization of semiconductors by photoluminescence and electroluminescence measurements in electrolyte solutions, *by K. Uosaki* 98

APRIL, 1990

editorial

Vibrational spectroscopy, Fourier transforms and analytical chemistry, *by J. R. Durig and J. F. Sullivan* 104

opinion

Process Fourier transform infrared spectroscopy, *by L. O. Eikrem* 107

meeting reports

Analytical methods in biotechnology, *by C. R. Hill* 109

computer corner

Interrupt driven data acquisition with the IBM personal computer, *by L. E. Bowman, M. A. Victor and S. R. Crouch* 111

trends

Fourier transform Raman spectroscopy in an industrial environment, *by K. P. J. Williams and S. M. Mason* 119

Fourier transform mid-infrared spectroscopy for food analysis, *by R. H. Wilson* 127

Application of Fourier transformation in high resolution gas chromatographic trace analysis, *by T. Hevesi, J. Krupcík, E. Benická, D. Repka and J. Garaj* 132

Circular dichroism — II. Analytical applications, *by N. Purdie, K. A. Swallows, L. H. Murphy and R. B. Purdie* 136

MAY, 1990

editorial

Glasnost, Perestroyka and analytical chemistry, *by S. Görög* 143

monitor

Some recent trends in the use of instrumental methods for trace metal analysis, *by T. Braun and S. Zsindely* 144

meeting reports

41st Pittsburgh conference and exposition on analytical chemistry and applied spectroscopy, *by S. G. Weber* 147

computer corner

Weighted least squares evaluation of slope from data having errors in both axes, *by A. H. Kalantar* 149

trends

Miniaturization in column liquid chromatography, *by D. Ishii and T. Takeuchi* 152

Soil-gas surveys for detection and delineation of groundwater contamination, *by H. B. Kerfoot* 157

A small expert system for solid phase extraction, *by M. Moors and D. L. Massart* 164

Solid-state electrochemical oxygen sensors for operation at room temperature, *by N. Yamazoe and N. Miura* 170

JUNE/JULY, 1990

monitor

National publication productivities and performances in analytical chemistry core journals, 1981–1985, *by T. Braun and A. Schubert* 176

meeting reports

2nd International symposium on high performance capillary electrophoresis, *by N. J. Reinhoud* 182

1st International symposium on hyphenated techniques in chromatography, *by G. Redant* 183

computer corner

APL as a development language for multivariate spectroscopic applications, *by D. F. Wirsz* 185

biotechnology focus

Real-time monitoring of cellular biomass: methods and applications, *by D. K. Kell, G. H. Markx, C. L. Davey and R. W. Todd* 190

trends

New lamps for old — recent progress in UV sources for absorption detectors in liquid chromatography, *by K. P. Jones* 195

Analytical applications of electrogenerated chemiluminescence, *by G. M. Greenway* 200

Practical options for microwave digestions, *by G. M. Kimber and S. Kokot* 203

AUGUST, 1990

meeting reports

1st International symposium on near infrared spectroscopy used in the food and feed industry, *by D. Coleman* 208

2nd International symposium on applications of analytical techniques to industrial process control, *by H. van den Dolder* 209

Symposium characterization of macromolecules used as pharmaceutical excipients, *by A. Arbin, H. Nyquist and J. Vessman* 211

feature

The environmental analysis of archaeological sites, *by H. Arai* 213

computer corner

Programming control and data acquisition routines for the IEEE-488 instrumentation interface, *by O. Lee, P. D. Wentzell, D. A. Boyd and A. P. Wade* 217

biotechnology focus

Specific monitoring of chromatographic procedures, *by B. Danielsson and P.-O. Larsson* 223

trends

Analytical approaches to the monitoring of toxicological levels of cadmium in environmental sites, *by K. Robards and P. J. Worsfold* 228

Fourier transform infrared spectroscopy and flammability studies of novelty aerosols, *by H. Sachdev, G. H. J. Merson and I. P. Axford* 231

Ligand exchange for trace enrichment and selective detection of ionic compounds, *by H. Irth and U. A. Th. Brinkman* 235

SEPTEMBER, 1990

opinion

The future of bioseparations, *by V. Berry* 242

meeting reports

20th International Roland W. Frei memorial symposium on environmental analytical chemistry, and 4th workshop on the chemistry and analysis of environmental hydrocarbons, *by E. Merian* 246

2nd International symposium on applied mass spectrometry in the health sciences, *by M. V. Doig and D. J. Harvey* 248

2nd International symposium on the analysis of anabolizing and doping agents in biosamples, *by G. Debruyckere* 249

computer corner

Program for Pareto-optimality in multicriteria problems, *by H. R. Keller and D. L. Massart* 251

trends

Approaches to high resolution ^{1}H NMR in solids, *by M. Munowitz* 253

Analytical applications of NMR imaging techniques, *by G. J. Nesbitt and A. de Groot* 263

Quantitative luminescence imaging in the biosciences using the CCD camera: analysis of macro and micro samples, *by C. E. Hooper and R. E. Ansorge* 269

OCTOBER, 1990

monitor

The geography of world research in analytical chemistry, 1981–1985, *by T. Braun, W. Glänzel and A. Schubert* 278

meeting reports

4th International LIMS conference, *by R. R. Mahaffey* 280

4th Symposium on the analysis of steroids, *by H. Lingeman* 281

Geoanalysis 90, an international symposium, *by C. Riddle* 282

computer corner

Software for randomization tests, *by C. Vandenbosch, V. Therry and D. L. Massart* 283

trends

Two-dimensional NMR analysis of polymers in solution, *by H. N. Cheng and G. H. Lee* 285

Polyamine determination in clinical laboratories by high-performance liquid chromatography, *by T. Matsumoto, T. Tsuda and O. Suzuki* 292

Fractals and fractal-like concepts in chemical analysis, *by H. A. Mottola* 297

Principal components regression in practice. An evaluation of EMD battery activity from X-ray diffraction patterns, *by R. P. Williams, D. A. J. Swinkels and M. Maeder* 303

NOVEMBER/DECEMBER, 1990

monitor

Some recent trends in instrumental organic analysis, *by T. Braun and S. Zsindely* 309

meeting reports

2nd Scientific computing and automation (Europe) conference and exhibition, *by R. D. McDowall* 312

J. Heyrovský centennial congress on polarography and 41st meeting of the international society of electrochemistry, *by R. Kalvoda* 313

8th International symposium on mass spectrometry in life sciences, *by J. Van Bocxlaer* 314

computer corner

Easy analytical calculations and data publication with GKSoft Graph, *by G. Kraus* 316

biotechnology focus

Flow-ELISA: Binding assays for process control, *by B. Mattiasson, M. Nilsson, P. Berdén and H. Håkanson* 317

trends

Laser desorption ionization mass spectrometry of large biomolecules, *by M. Karas and U. Bahr* 321

Rotating disk voltammetric measurements in neurobiology and neuropharmacology, *by J. O. Schenk, T. A. Patterson and J. S. McElvain* 325

Stable carbon isotope ratio analysis on single components in crude oils by direct gas chromatography–isotope analysis, *by M. Bjorøy, K. Hall and J. Jumeau* 331

The analysis of brassinosteroids — plant growth-promoting substances, *by N. Ikekawa* 337
